

DAILY FINANCIAL BULLETIN

Global Macro & Crypto Market Intelligence

Wed, Sep 16 2026

NEUTRAL Mixed macro signals and cautious positioning ahead of the Fed decision are keeping markets in a neutral balance.

The market backdrop remains neutral as short-term losses in risk assets are offset by several more supportive traditional indicators. The VIX eased to **16.97**, while the DXY edged higher to **99.68**; the 10-year U.S. Treasury yield stood at **4.996%**, just below the 5% threshold. Total crypto market capitalization fell **4.38%** over 24 hours to **\$2.60 trillion**, with BTC dominance at **58.54%** and Fear & Greed at **51**, signaling neutral sentiment. BTC declined 1.40% and ETH 3.07% over 24 hours, although their 30-day gains remain 19.9% and 27.0%, respectively. The Fed rate decision, FOMC statement and economic projections are today's key catalysts, while retail-sales data may further influence yields and crypto volatility.

STRATEGIC RESEARCH FOCUS

MACRO

Will the Fed decision reprice the Treasury yield above the 5% threshold?

With the 10-year U.S. Treasury yield hovering just below 5%, today's Federal Funds Rate decision, FOMC statement, and economic projections should be read together. The research question is how the decision and dot-plot signal will reprice the yield curve, the dollar, and rate-sensitive technology stocks; the key signals are whether the 10-year yield holds above 5% and whether the 2026 median projection moves away from 3.8%.

PRIMARY SOURCES / REPORTS:

- **Federal Reserve — FOMC Calendar & Statements** — Use the official decision, statement, and economic projections to assess the policy path, rationale, and forward guidance.
- **US Treasury — Daily Yield Curve Rates** — Compare the pre- and post-decision 10-year yield and the maturity curve to test whether the 5% threshold is sustained and how the curve reacts.
- **CME FedWatch Tool** — Track changes in futures-implied rate expectations before and after the FOMC decision to measure the pricing surprise.

COMMODITIES

Is the Strait of Hormuz disruption becoming a supply shock?

Single-digit ship crossings through the Strait of Hormuz, the Houthi drone incident near Saudi Arabia, and a 2.17% rise in the energy sector form a combined supply-risk investigation. The research question is how long geopolitical tension can affect oil flows and the risk premium; the concrete signals are whether crossings recover, what petroleum inventories show, and whether energy equities maintain relative strength.

PRIMARY SOURCES / REPORTS:

- Reuters — Strait of Hormuz ship crossings remain in single digits, data shows - Reuters — Track daily ship crossings and signs of normalization, assessing whether the disruption represents a persistent energy-supply risk.
- Reuters — Saudi coalition says Houthi drone destroyed near Mecca - Reuters — Examine the incident’s geographic scope and subsequent security events to determine whether regional risk is spreading to shipping and energy infrastructure.
- EIA — Weekly Petroleum Status Report — Look for physical-market evidence of a supply shock in U.S. crude and product inventories, refinery utilization, and imports.

CRYPTO

Ahead of the Fed, is the crypto selloff driven by leverage or institutional outflows?

Total crypto market capitalization fell 4.38% in 24 hours while Bitcoin and Ethereum ETFs recorded net outflows of \$450.4 million and \$142.3 million, respectively; at the same time, Bitcoin open interest rose 16.23%, Ethereum open interest rose 7.11%, and the Coinbase premium fell to -0.126. The research question is whether the decline reflects weak spot demand or forced unwinding of derivatives leverage; monitor Bitcoin’s reaction at 75,476 support and 77,937 resistance, a reversal in ETF flows, and whether open interest falls alongside price.

PRIMARY SOURCES / REPORTS:

- Farside — Bitcoin ETF Flows (All Data) — Check whether the \$450.4 million Bitcoin ETF outflow recorded on September 15 persists and whether aggregate flows turn positive.
- Farside — Ethereum ETF Flows — Assess whether the \$142.3 million total Ethereum ETF outflow recorded on September 15 continues and whether ETHA flows recover.
- Coinglass — Derivatives Data — Track Bitcoin and Ethereum open interest, funding rates, and liquidations together to test whether rising positions represent directional leverage or risk reduction.

SPOT ETF FLOWS HISTORY (LAST 10 DAYS)

Analyst Note: On September 15, spot Bitcoin ETFs recorded total net outflows of \$450.4 million, including \$161.7 million from IBIT and \$214.8 million from FBTC, signaling short-term selling pressure. ETF inflows indicate buying demand, while outflows indicate position reduction; the -0.126% Coinbase premium also points to subdued U.S. spot demand.

TOP STORIES

CNBC · 10:00

Flyers are happier with U.S. airports, despite near record travel levels, J.D. Power report shows

Travelers gave higher ratings in part because of the newer gates and terminals many airports have opened in recent years, according to the study.

AI Insight: Improved airport satisfaction suggests that new terminal and gate investments are supporting service quality even as travel demand remains elevated. However, today's retail-sales data and the Fed decision will be more direct catalysts for consumer and travel-related equities.

CNBC · 08:58

Yield on 10-year Treasury hovers above 5% as investors await Fed decision

The Federal Reserve is widely expected to hike interest rates on Wednesday.

AI Insight: The 10-year Treasury yield hovering at 4.996% keeps discount-rate pressure elevated ahead of the Fed decision. ETF outflows, a negative Coinbase premium and rising open interest reinforce cautious positioning in risk assets ahead of the announcement.

REUTERS · 03:33

Strait of Hormuz ship crossings remain in single digits, data shows - Reuters

AI Insight: Single-digit vessel crossings through the Strait of Hormuz keep energy-supply and geopolitical risk premiums elevated. Brent's 18.60% 30-day gain raises sensitivity to inflation and interest rates, potentially limiting risk appetite ahead of the Fed decision.
