

DAILY FINANCIAL BULLETIN

Global Macro & Crypto Market Intelligence

Thu, Aug 27 2026

RISK-ON Falling volatility, tighter credit risk premia and strong crypto flows show that risk appetite is firmly in control.

Risk appetite strengthened across global markets, with Nasdaq 100 futures up 1.16% and SMH gaining 2.88%; NVIDIA led technology with a 9.31% advance. The VIX fell 5.06% to 14.44 and MOVE declined 3.45% to 69.44, signaling easing volatility pressure. The U.S. 10-year Treasury yield stood at 4.66% after a daily change of -0.40 percentage points, while the DXY slipped 0.07%, supporting risk assets. Total crypto market capitalization reached **\$2.73 trillion**, up 0.58% over 24 hours; BTC rose to \$80,521, Bitcoin dominance was 59.20%, and Fear & Greed registered 71, or Greed. Core PCE rose 0.2% month over month on August 26, in line with forecasts, while August 27 unemployment claims came in at 203K versus 208K expected; however, Kansas City Fed's Schmid described inflation as stubborn and sticky, preserving a cautious policy risk.

STRATEGIC RESEARCH FOCUS

CRYPTO

ETF inflows and leverage are accelerating together: how durable is the Bitcoin rally?

Spot Bitcoin ETFs attracted \$232.2 million and Ethereum ETFs \$192.4 million on August 26, while BTC and ETH open interest rose 27.85% and 16.76%, respectively; genuine demand and derivatives fragility are therefore expanding at the same time. The research question is whether ETF demand can keep supporting prices and whether funding and open interest are approaching an overheating threshold as BTC tests the \$80,843.72 resistance.

PRIMARY SOURCES / REPORTS:

- **Farside — Bitcoin ETF Flows (All Data)** — Check the August 26 total inflow, IBIT and FBTC contributions, and whether inflows continue across subsequent sessions.
- **Farside — Ethereum ETF Flows** — Examine the persistence of the \$192.4 million inflow, including ETHA and FETH, and concentration across funds.
- **Coinglass — Derivatives Data** — Track BTC and ETH open interest, funding rates, and liquidation clusters to test how much spot inflows are being amplified by leverage.

MACRO

Sticky inflation versus easing financial conditions: will the Fed's September path be repriced?

Core PCE printed 0.2% month over month in line with expectations, while Kansas City Fed President Schmid called inflation "stubborn" and "sticky"; meanwhile, the 10-year Treasury yield fell to 4.66%, VIX declined to 14.44, and high-yield spreads narrowed by 6 basis points. The research question is whether the August 28 payrolls revision and inflation expectations will disrupt these easier conditions and alter the 3.8% 2026 median policy-rate path ahead of the September 16 FOMC meeting.

PRIMARY SOURCES / REPORTS:

- **Federal Reserve — FOMC Calendar & Statements** — Review the September 16 FOMC schedule, forthcoming decision and communication materials, and compare the prior statement.
- **BEA — PCE Price Index** — Verify the monthly core PCE result and examine momentum in services, goods, and housing components.
- **US Treasury — Daily Yield Curve Rates** — Track the decline in the 10-year yield and, where available, changes across the short-to-long Treasury curve.

EQUITIES

A narrowing market led by AI: do Nvidia's results validate the sector rotation?

The three-stock success story involving Nvidia, Salesforce, and CrowdStrike should be read alongside a 1.16% rise in Nasdaq 100 futures, a 2.88% gain in SMH, and a 2.87% increase in the technology ETF, because every other listed S&P 500 sector declined. The research question is whether concentration in AI and software stocks is being driven by durable earnings revisions or by narrow risk appetite amid low volatility and greed; the concrete signal to watch is renewed participation outside technology and forward guidance in company filings.

PRIMARY SOURCES / REPORTS:

- **SEC EDGAR Full-Text Search** — Search the latest 10-Q, 10-K, and 8-K filings from Nvidia, Salesforce, and CrowdStrike for revenue growth, margins, order or bookings metrics, and forward guidance.
- **CNBC — We went 3 for 3 — what we learned from wins at Nvidia, Salesforce, and CrowdStrike** — Dissect which operating indicators support the investment theses for the three stocks and the rationale behind their post-earnings price reactions.
- **CNBC — Family offices are making a bullish bet on the stock market, according to CNBC Family Office Portfolio Tracker** — Examine technology and growth-stock weights, concentration risk, and cash allocations in family-office portfolios representing \$1.4 trillion in total assets.

TOP STORIES

CNBC · 15:17

We went 3 for 3 — what we learned from wins at Nvidia, Salesforce, and CrowdStrike

The Investing Club holds its "Morning Meeting" every weekday at 10:20 a.m. ET.

AI Insight: This item mainly lists the Investing Club's daily meeting and its wins in three stocks; it offers no independent market catalyst, so no additional insight is provided.

CNBC · 13:40

Family offices are making a bullish bet on the stock market, according to CNBC Family Office Portfolio Tracker

The data includes the portfolios of hundreds of family offices, representing a total of \$1.4 trillion in assets.

AI Insight: The bullish equity positioning reported among family offices, representing \$1.4 trillion in assets, is consistent with the low VIX, tighter HY OAS and strong technology performance. However, the divergence between BTC's 12% seven-day gain and limited sector breadth argues for selective positioning.

CNBC · 13:00

This is ‘one of the worst’ credit card habits, experts say—41% of cardholders do it

Missing a credit card payment can damage your credit for years, while paying only the minimum can leave you in debt for decades.

AI Insight: The habit of making only minimum credit-card payments highlights the risk of prolonged household debt servicing; while not a direct market catalyst, it matters for consumer resilience in a high-rate environment. With the 10-year yield at 4.66%, the risk-asset rally continues, but restrictive financial conditions could create delayed pressure on consumption.
